\*Stopped to assist fellow racer that lost his surfski. Looking at my GPS data, the net time lost due to stopping was about 4:34.

(6:48 was the actual time spent not paddling but we were still moving by drifting downwind. 4:34 is the estimated net time difference if we had not stopped.)

Times reported here are the actual elapsed times - which include the time to assist the capsized racer.

Winds at start of race: SW 17mph gusting to 21mph

Winds near end of race: WSW 15mph gusting to 18mph

Note: Course included a 250m portage of about 5 minutes.

Portage times are include in the elapsed time.
